- Includes Data Advisory consulting
- Pre-built report collection that provides business insight on day 1 of being live with Neat Data
- Easy to use reports and dashboards built in Power BI with the powerful Neat Data platform

NEAT DATA BUILDS VALUE BY DELIVERING ENTERPRISE EFFICIENCY

Our Pre-Built Reporting solution allows users to quickly focus on building reports that improve business performance and not consume time organizing the data. Empower your organization to drive better business decisions from your ERP through benefits such as:

YOUR MOST IMPORTANT FOOD DATA

- See your business results end-to-end to get the full story of your performance from our **Sales and Orders Package**, **Forecasting Package**, **Inventory Management Package**, and **Financials Package**.

TIME AND MONEY SAVINGS

- Reduce/Eliminate Time Spent on Data-Warehousing Activities and Resources
- Reduce Time Spent Preparing Reports up to 100%
- Access to reports for individuals without ERP user licenses

REPORT AND DASHBOARD AUTOMATION

- Automatic refresh of data with all reports and dashboards updating
- Reporting flexibility with integration with Microsoft Excel

SINGLE ENTERPRISE–WIDE REPORTING PLATFORM THAT JOINS DATA FROM ALL YOUR DATA SOURCES

- One Version of the Truth Reporting - all your data sources in one reporting tool
- All your Reporting Needs in one tool - financial, operational, sales
